  - **Announcement:** Hey Phoenix, today we want to address an important issue that affects our school community: social bullying. Social bullying involves harming someone through manipulation of social relationships. This can include spreading rumors, excluding individuals from groups, or using social media to demean others. Up to 40% of high school students in Canada have experienced social bullying. Victims may experience feelings of isolation, anxiety, and depression. As a community, we must work together to create a safe and supportive environment for everyone. We encourage all students to stand up against social bullying. Remember Phoenix, kindness and respect go a long way in making our school a better place for all. Thank you for your attention, and let's support one another in fostering a positive school culture.
